# Dynabelter® Standard Contact Arm Assemblies

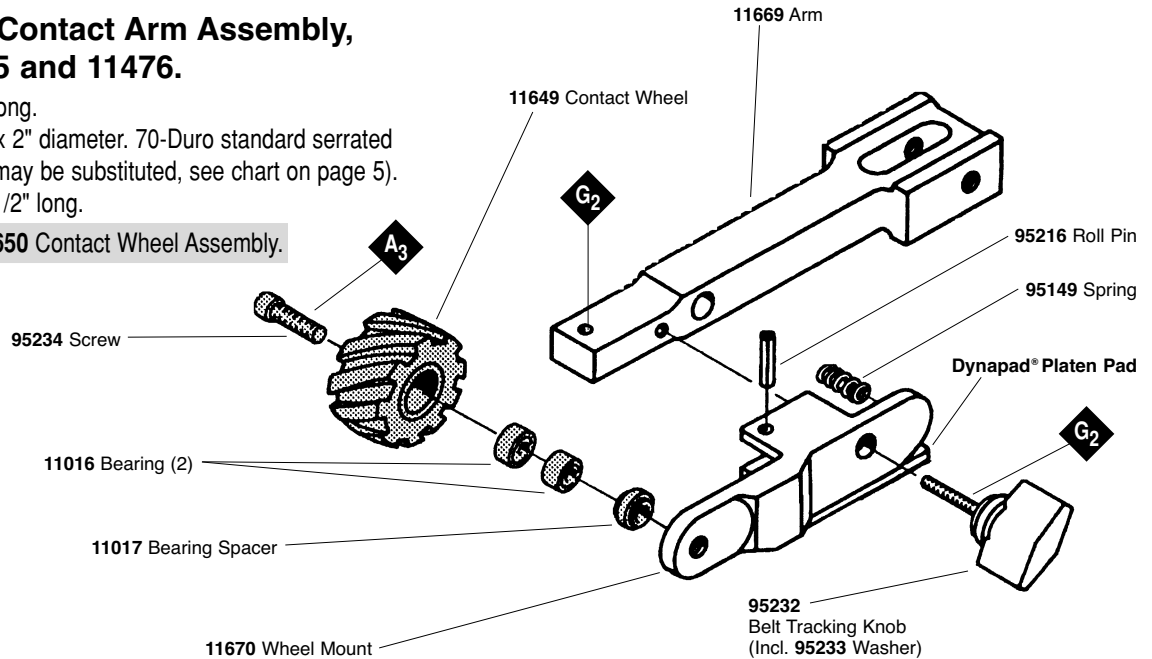

## 11681 Standard Contact Arm Assembly, for Models 11475 and 11476.

**Belt Size:** 1" wide x 30" long.

**Contact Wheel:** 1" wide x 2" diameter. 70-Duro standard serrated urethane. (Other wheels may be substituted, see chart on page 5).

**Platen Pad:** 1" wide x 2-1/2" long.

Shaded parts indicate **11650 Contact Wheel Assembly**.

## 11601 Standard Contact Arm Assembly, for Model 11462

**Belt Size:** 1" wide x 60" long.

**Contact Wheel:** 1" wide x 4" diameter. 40-Duro smooth rubber.

Shaded parts indicate **11620 Contact Wheel Assembly**.

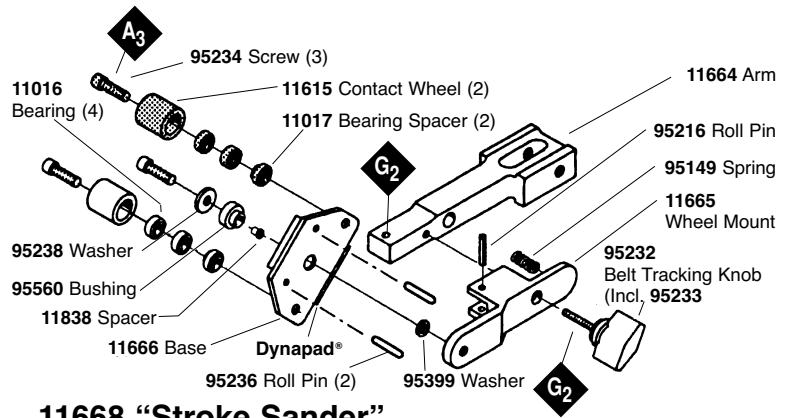

The **11462** Dynabelter® Finisher normally uses 1" wide x 60" long abrasive belts. The **11602** Extension Tube can be modified to accommodate various belt lengths.

# Optional Contact Arm Assemblies

## 11663

**Belt Size:** 1" wide x 30" long.  
**Contact Wheel:** 1" wide x 1" diameter. 80-Duro smooth rubber.  
**Platen Pad:** 1" wide x 2-1/2" long.  
 Shaded parts indicate 11616 Contact Wheel Assembly.

## 11668 "Stroke Sander"

**Belt Size:** 1" wide x 30" long.  
**Contact Wheel:** 1" wide x 1" diameter. 80-Duro smooth rubber.  
**Platen Pad:** 1" wide x 1-7/8" long.  
 Shaded parts indicate 11616 Contact Wheel Assembly (2 included).

## 11677

**Belt Size:** 1" wide x 30" long.  
**Contact Wheel:** 1" wide x 4" diameter. 40-Duro smooth rubber.  
**Note:** 80-Duro available.  
 Shaded parts indicate 11620 Contact Wheel Assembly.

## 11682

**Belt Size:** 1/2" or 1" wide x 30" long.  
**Contact Wheel:** 1" wide x 4" diameter. 70-Duro radiused rubber.  
 Shaded parts indicate 11638 Contact Wheel Assembly.

## 11684

**Belt Size:** 1" wide x 30" long.  
**Contact Wheel:** 5/8" wide x 4" diameter. 40-Duro standard serrated rubber.  
 Shaded parts indicate 11642 Contact Wheel Assembly.

**Note:** Arm extenders are available: 11656 for 42" belts; 11657 for 54" belts; 11679 for 60" belts.

# Important Operating, Maintenance and Safety Instructions

Carefully read all instructions before operating or servicing any Dynabrade® Abrasive Power Tool.

**Warning:** Hand, wrist and arm injury may result from repetitive work motion and overexposure to vibration.

## Operating Instructions:

**Warning:** Eye, face, respiratory, sound and body protection must be worn while operating power tools. Failure to do so may result in serious injury or death. Follow safety procedures posted in workplace.

1. With power source disconnected from tool, securely position abrasive belt on tool (see abrasive belt/contact arm change instructions).
2. Connect power source to tool. Be careful **not** to depress throttle lever in the process.
3. Check tool speed with tachometer. If tool is operating at a higher speed than the RPM marked on the tool or operating improperly, the tool should be serviced to correct the cause before use.
4. Always work off the return side of the abrasive belt. This will ensure superior tracking and less down time of machine.

## Abrasive Belt/Contact Arm Change Instructions:

### To Change Belt:

1. Disconnect power source.
2. Remove 11592 Cover Guard.
3. Release 11551 Belt Tension Lever.
4. Pull belt backwards and to the left until belt is released from drive wheel.
5. Reverse process for applying new belt.
6. Connect power source.
7. Depress throttle lever to start motor and belt rotation.
8. Adjust belt tracking by turning 95232 Belt Tracking Knob on contact arm assembly to the left or right accordingly.

### To Change Contact Arm Assembly:

1. Disconnect power source.
2. Remove 11592 Cover Guard.
3. Remove abrasive belt (see instructions).
4. Remove 95419 Rough Adjustment Knob.
5. Remove Contact Arm and replace with desired contact arm.
6. Replace 95419 Knob. Do not tighten knob at this point.
7. Replace abrasive belt.
8. With abrasive belt in proper position, push contact arm assembly forward until the contact wheel is tight against abrasive belt.
9. Tighten 95419 Knob.
10. Replace 11592 Cover Guard.
11. Reset 11551 Belt Tension Lever.
12. Connect power source and depress throttle lever to start motor and abrasive belt rotation.
13. Adjust belt tracking by turning 95232 Belt Tracking Knob on contact arm assembly to the left or right accordingly.

## Maintenance Instructions:

**Products offered by Dynabrade should not be converted or otherwise altered from original design without expressed written consent from Dynabrade, Inc. All Dynabrade rotary vane air tools must be used with a filter-regulator-lubricator to maintain all warranties.**

1. Check tool speed regularly with a tachometer. If tool is operating at a higher speed than the RPM marked on the tool, the tool should be serviced to correct the cause before use.
2. Some silencers on air tools may clog with use. Clean and replace as required.
3. All Dynabrade rotary vane air motors should be lubricated with two drops of Dynabrade Air Lube (P/N 95842: 1pt. 473ml.) every four hours of use.
4. It is strongly recommended that all Dynabrade rotary vane air tools be used with a Filter-Regulator to minimize the possibility of misuse due to unclean air, wet air or insufficient lubrication. Dynabrade recommends the following: 11411 Air Line Filter- Regulator-Lubricator — Provides accurate air pressure regulation, two-stage filtration of water contaminant's and micro-mist lubrication of pneumatic components. Operates 55 SCFM @ 100 PSIG has 1/2" NPT female ports.

## Safety Instructions:

**Products offered by Dynabrade should not be converted or otherwise altered from original design without expressed written consent from Dynabrade, Inc.**

- **Important:** User of tool is responsible for following accepted safety codes such as those published by the American National Standards Institute (ANSI).
- **Warning:** Eye, face, respiratory, sound and body protection must be worn when operating power tools. Failure to do so may result in serious injury or death.
- Products offered by Dynabrade should not be converted or otherwise altered from original design without the expressed written consent of Dynabrade, Inc.
- Tool RPM rating must never exceed abrasive/accessory RPM rating, regardless of tools capacity.
- Operate machine for one minute before application to workpiece to determine if machine is working properly and safely before work begins.
- Always use proper guards. Make sure guards are in proper position, secure and in good repair.
- Always disconnect power supply before changing abrasive or making machine adjustments.
- Inspect abrasives for damage or defects prior to installation on tools. Make sure belts are mounted properly; check for proper tension and belt tracking.
- Please refer to Dynabrade's Warning/Safety Operating Instructions Tag (Reorder No. 95903) for more complete safety information.
